KARUMURU SHASIKALA

Bengaluru, Karnataka | +91 8790207199 | shashi05shashi15@gmail.com | linkedin.com/in/karumuru-shasikala | github.com/shashikala317

PROFESSIONAL SUMMARY

Detail-oriented Cloud Engineer fresher with knowledge of AWS infrastructure design, Linux administration, and DevOps automation pipelines. Hands-on experience provisioning Infrastructure as Code (IaC) using Terraform and deploying containerised web applications. Eager to leverage strong problem-solving skills to build, deploy, and manage highly scalable, secure cloud architecture.

PROFESSIONAL SKILLS

- **Cloud Platforms:** Amazon Web Services (AWS - EC2, VPC, IAM, Lambda, RDS)
- **Containers & Orchestration:** Docker, Kubernetes, EKS (Elastic Kubernetes Service)
- **IaC & Automation:** Terraform (HCL), CloudFormation, Ansible
- **CI/CD Tools:** Jenkins, GitHub Actions, Git, GitHub
- **Monitoring & Logging:** AWS CloudWatch
- **Operating Systems & Web Servers:** Linux (Ubuntu, Amazon Linux), Apache Web Server, PuTTY
- **Programming & Languages:** Python, Bash, HTML, CSS, SQL

PROJECTS

AWS Serverless Student Management API github.com/shashikala317/aws-lamda-rds-project

- Designed and successfully deployed a fully functional REST API using AWS Lambda and API Gateway.
- Integrated Amazon RDS MySQL to seamlessly execute core CRUD operations on relational student datasets.
- Configured isolated, secure VPC connectivity and restrictive IAM roles to robustly enforce least-privilege user access controls.

AWS Infrastructure Provisioning with Terraform github.com/shashikala317/terraform-aws-infrastructure

- Automated the cloud deployment architecture of an AWS VPC, EC2 instances, and custom Security Groups using Terraform (IaC).
- Defined highly reusable HCL modules to standardise multi-tier infrastructure provisioning configurations across diverse testing environments.
- Eliminated manual dashboard provisioning errors, reducing test environment setup times by over 40%.

Linux Apache Portfolio Website github.com/shashikala317/linux-apache-portfolio-website

- Deployed a production-ready personal portfolio website on an Ubuntu Linux server utilizing the Apache Web Server framework.
- Configured distinct virtual hosts to cleanly map incoming web traffic, thoroughly validation-testing deployment stability inside VMware Workstation.
- Managed incremental workspace code updates with Git version control and hosted project repositories on GitHub.

EDUCATION

- **Bachelor of Technology (B.Tech)** in Electrical and Electronics Engineering (EEE) **2023 – 2026**
  Sai Rajeswari Institute of Technology, Proddatur, AP
- **Diploma** in Electrical and Electronics Engineering (EEE) **2020 – 2023**
  Government Polytechnic for Women, Kadapa, AP
- **Secondary School Certificate (SSC)** **2019 – 2020**
  Z.P.G.H.S Girls High School

CERTIFICATIONS

- **Cloud Computing Course Completion Certificate** – Besant Technologies
  (Linux, AWS, DevOps, Python and SQL databases)
